EnLiten™ Flush-Glazed Designs

FOR FIBER-CLASSIC® & SMOOTH-STAR® DOORS & SIDELITES

THERMA-TRU® DOORS

MANIFEST YOUR OUTER HOME

Designs for any entry.

At Therma-Tru, we believe your door should always welcome you home — while playing seamlessly into your style. Our EnLiten™ flush-glazed designs create striking profiles that effortlessly combine indoor and outdoor living spaces, inviting in more natural light than ever. The possibilities are endless, giving you doors that perfectly fit your lifestyle.

Create a clean look with maximum views.

During manufacturing, double- or triple-pane glass is built directly into the door. This design eliminates the need for a lite frame and screw plugs, achieving a seamless, consistent finish. Flush-glazed glass expands your view by 16%[1] — choose flush-glazed glass for more natural light and a sleek, uninterrupted aesthetic.

Discover attractive, durable entry solutions for around the house, including patio, side and back doors allowing for optimal daylight and outdoor views, or complete privacy.

Strength is built in.

Our doors are durable by design. Flush-glazed glass represents a trouble-free solution that provides a superior barrier against the elements, resulting in performance you can depend on.

Durable by design.

Intentional design for exceptional performance — sleek flush-glazed glass provides increased protection against air and water infiltration.[1]

Superior Sound Dampening

Doors with flush-glazed glass do a better job of dampening outside noise compared to a Lip-lite alternative.

11% More Energy-Efficient

The Low-E glass used in flush-glazed doors delivers a clear view and is 11% more energy efficient than 1/2" Low-E glass in a Lip-lite frame.[2]

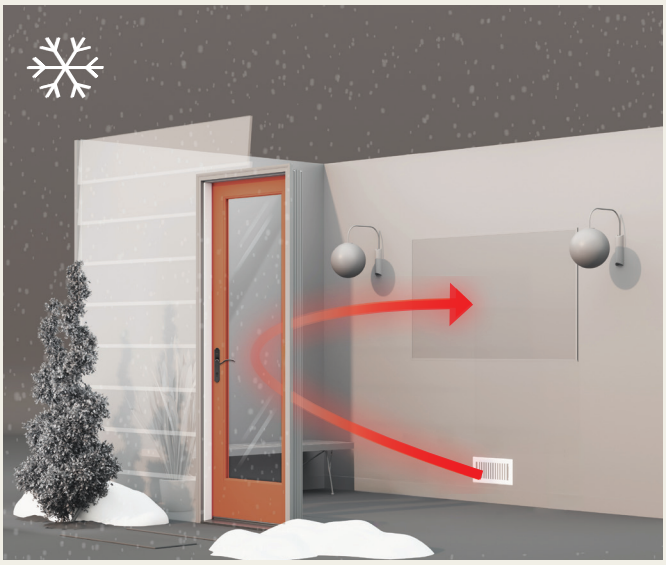
Withstands Winds Up to 167mph

Door systems with flush-glazed glass are designed and tested to withstand wind forces up to 167 mph (DP-50).[3] (ASTM-E330)

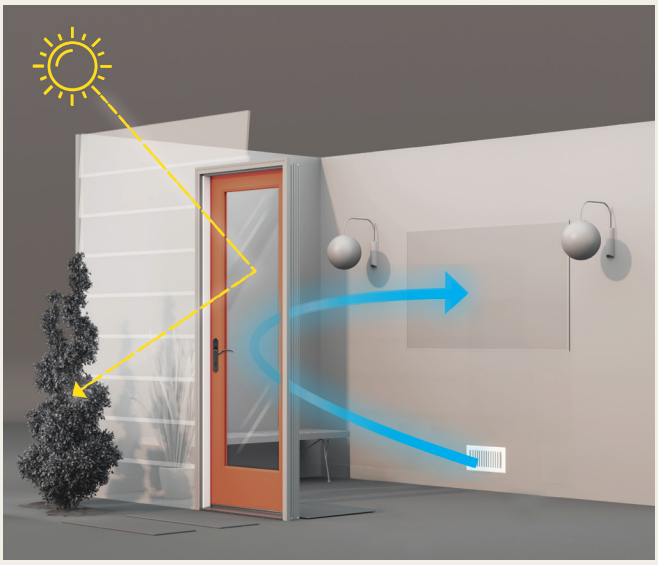
Year-round comfort, no matter the weather.

Factory-coated Low-E glass features a thin layer that reflects infrared and ultraviolet (UV) light, helping deliver exceptional energy efficiency.

NEW **Select flush-glazed full-lite configurations are now available with triple-pane Low-E clear and privacy glass options to meet ENERGY STAR® requirements indicated in gold starting on page 10.**



In cold weather, Low-E glass reflects a home's heat back inside to help keep the home warm.



In warm weather, Low-E glass reflects the sun's rays off the glass and a home's air conditioning back inside to help keep the home cool.
